ELSEVIER

Robotics and Autonomous Systems 24 (1998) 207–208

Robotics and Autonomous Systems

Contents Volume 24

Special Issue: Scientific Methods in Mobile Robotics
Guest Editors: Ulrich Nehmzow, Michael Recce

U. Nehmzow and M. Recce, Scientific methods in mobile robotics (Editorial) 1

O. Lemon and U. Nehmzow, The scientific status of mobile robotics: Multi-resolution mapbuilding as a case study 5

J. Wyatt, J. Hoar and G. Hayes, Design, analysis and comparison of robot learners 17

K.D. Harris and M. Recce, Experimental modelling of time-of-flight sonar 33

V.A. Walker, H. Peremans and J.C.T. Hallam, Good vibrations: Exploiting reflector motion to partition an acoustic environment 43

T. Duckett and U. Nehmzow, Mobile robot self-localisation and measurement of performance in middle-scale environments 57

A. Billard and K. Dautenhahn, Grounding communication in autonomous robots: An experimental study (Short Communication) 71

Robotics Competition Corner 81

Calendar 85

Special Issue: Multi-Agent Rationality
Guest Editor: Magnus Boman

M. Boman, Towards artificial decision making (Editorial) 89

M. Bonatti, Y.M. Ermoliev and A.A. Gaivoronski, Modeling of multi-agent market systems in the presence of uncertainty: The case of information economy 93

M.P. Wellman and P.R. Wurman, Market-aware agents for a multiagent world 115

C. Castelfranchi and R. Conte, Limits of economic and strategic rationality for agents and MA systems 127

C. Castelfranchi and R. Falcone, Towards a theory of delegation for agent-based systems 141

P. Faratin, C. Sierra and N.R. Jennings, Negotiation decision functions for autonomous agents 159

S. Kurihara, S. Aoyagi, R. Onai and T. Sugawara, Adaptive selection of reactive/deliberate planning for a dynamic environment 183

Robotics Competition Corner 197

Calendar 199
